Maersk has reviewed Emissions surcharge (EMS/ESS) for Q1 2025 and the tariffs will be effective 01 January 2025. The Emissions surcharge tariffs have been calculated using the average price of European Union Allowance (EUA) from [EUA Daily Future \(ice.com\)](#) . The details on the period used for the calculation can be found in the table below:

Reference period

From Date From Month	To Date To Month	Effective Date	Type of EUA	Average EUA Price (In EUR)

- This increase is part of the EU ETS legislation phase-in.
- Additionally, a new regulation called FuelEU Maritime applies from 2025. FuelEU sets limits on the yearly average greenhouse gas (GHG) intensity of the energy used by ships that call at European ports. These limits will gradually decrease over time, starting with a 2% reduction by 2025 and reaching up to an 80% reduction by 2050.
 - We have decided to simplify the process for our customers by recovering the additional cost to comply with Fuel EU through assessment of the “emissions surcharge” (EMS/ESS) which also includes the EU ETS cost of compliance. For more details on the Fuel EU Maritime Regulation, please click [here](#) .
 - Emissions surcharge will be applied to all bookings with Load Port and/or Discharge Port country part of EU/EEA.
 - For all bookings from China (Hongkong/Taiwan not included), we will add the emissions surcharge to the base freight rate for regulatory reasons. Base freight rate will be adjusted quarterly (increase/decrease) to reflect quarterly updated Emissions surcharge.
 - ECO Delivery Bookings will not be charged with emissions surcharge. Choosing ECO Delivery means we replace fossil fuels with green fuels. This investment reduces green-house-gas emissions of your bookings and decarbonizes your supply chain. [Learn more about ECO Delivery](#).
- Twifly values low Emissions surcharges. Q1 2025 rates can be found in the tables in the following pages.
