Update - WDF (Weight Discrepancy Fee)

18 October 2024

Pakistan

India Middle East and Africa

Share

Following our continued efforts to enhance safety of our operations and drive higher reliability of our network, we need to update rules regarding weight discrepancy and consequences of non-compliance.

Effective 15th Oct 2024, all origins will be subject to the following Weight Discrepancy Fee (WDF):

Charge Code - WDF

Origin	Destination	Container Size/Type	Rate	Currency	Charge Basis
World	World	Any container type or size	300	USD	Per Container

The WDF is applicable to each container where:

- The difference (positive or negative) between the VGM weight and the weight declared in the shipping instructions is greater than 3000Kg.
- The VGM weight is greater than the maximum gross weight of the container, (as per CSC plate (Max Payload + Tare weight).
- The VGM weight is lesser than tare weight of the container.

These changes are part of our ongoing efforts to ensure compliance with international shipping standards and to enhance safety. The accuracy of weight during our operations is crucial to avoid incidents and for us to be more efficient, as it allows us to plan, in advance, how to better load, accommodate, and discharge each container in our vessels.

Should you have any questions or require further information, please do not hesitate to contact your local Maersk representative or reach out via Maersk.com.

Our teams are always standing by to assist whenever possible.
